

Mobile application used to assign, execute and verify tasks on a large scale in many locations simultaneously for any industry

CONSISTENT EXECUTION thanks to digital transformation of operations in manufacturing, heavy industry, mining, utilities and logistics

Employees know the guidelines better, comply with standards, fulfil their duties on time, report honestly and react on feedback.

Managers receive instant reporting, give feedback in real time, and base decisions on high quality data.

Benefits: After implementing TakeTask, all of our clients have increased operational effectiveness and safety.

Challenge

Large companies struggle to control false reporting, poor execution and suboptimal communication for their deskless workers.

Solution

TakeTask allows managers to quickly create and distribute tasks and workers to report their completion and receive feedback in real time.

Operations

- Fixed assets management
- Regular and self audits
- Maintenance procedures
- Access to guidelines

Safety

- Regular verification of equipment
- Work environment safety
- Employee health and safety checks
- Protection against Covid-19

Other

- Human Resources
- Employee motivation
- Knowledge base digitalisation
- Project management facilitation

Features
